MAGIC COOLING TOWEL

NEW

Others

Code : 5.3004

Quickly cool down by just soaking, wringing the water out and shaking. The magical cooling effect can last up to several hours and easy to reactivate it by repeating the same steps. The unique cooling system uses moisture from the towel to draw the sweat away from your skin to keep you cool. Everyone can use the cooling towel, even pets.

HOW IT WORKS? The super absorbent fiber weave technology of the mesh towel regulates the water inside and ensures water retention, so it's treating it kind of like an air-conditioner, and within seconds you get cold. Like sweat on your skin, when water evaporates it cools. Any ole cotton or microfiber towel would work, but not as well design to maximize evaporative cooling or comfort. If you are sweating a lot, rinse the 'salty water' out from time to time. Salt reduces evaporation/cooling rate.
